Trauma Nursing Core Course

The Trauma Nursing Core Course is designed by nurses for nurses. The intent of this course is to provide nurses with basic knowledge and a standardized approach for the care of trauma patients. It is intended to enhance cognitive skills, sharpen technical skills and provide a foundation for future learning.

Upon completion of the course, the participants will be able to perform rapid, initial assessment of the trauma patient. Participants will be able to identify injuries, institute appropriate life-saving interventions, assess patients' responses to resuscitation and communicate with other team members.

For more course specific information, please see the ENA website.
